

Give each player 17 chips of a single color

4 Player Only

52 Card + 1 Joker

Shuffle and place one card here
from the deck turned face up.

Deal out 13 cards to each player.

Dump Card

The suit of the turned card is the "dump suit",
the rank of the turned card is the "dump
number" and the Queen of dumps is the
Agony Aunt.

The Joker, or "Agony Uncle", represents the
turned card. Whoever holds the Joker uses it
exactly as if it were the card it represents.

▶ Must follow / No trump / A is strongest ~ 2 is weakest

▶ Highest card wins the trick; if you incur a penalty, place a chip
in the corresponding square.

▶ After several rounds the game ends when someone runs out of
chips. The player with the most remaining chips wins.

If you have
3 chips in
a row...

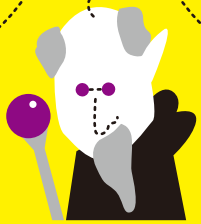

Discard an extra chip as a penalty.
(horizontally, vertically or diagonally)

After 13 tricks

There will be 9 chips on the board. These are
removed from the game and if any of the following
conditions are met, chips may be returned:

Win all tricks → Take back all your lost
Win no tricks → chips and start again with
17.
(does not apply if somebody else wins all tricks)

If you didn't place a
penalty chip... → Take back half the
chips you have already lost.
(round down)

Agony Uncle

Take the Joker

Last Trick

Win the last trick

Take the 'Q' of
the dump suit

Agony Aunt

Most Tricks

Win the most tricks

Dumppth Trick

Win the dumppth trick
(A→1 J→11 Q→12 K→13)
